

*MX PRODUCT GUIDE*

*TWENTY 4*

IN THE FOOTHILLS OF LOS ANGELES, CA  
IN THE EARLY 1960'S THINGS WERE A BIT  
DIFFERENT. THE DECADE OF CHANGE WAS  
RAPIDLY APPROACHING AND THE LANDSCAPE  
OF AMERICA WAS QUICKLY TAKING ROOT IN  
THE VALLEYS AND MOUNTAINS SURROUNDING  
THE CITY OF ANGELS. IT WAS HERE ALONG  
THE LOCAL MOUNTAINS AND TRAILS A YOUNG  
MAN NAMED JIM O'NEAL WOULD RIDE HIS  
MODIFIED TRIUMPH MOTORCYCLE TO SCHOOL  
AND WOULD FIND HIMSELF TAKING THE SAME  
TRIUMPH THROUGH THE DIRT AND TRACKS  
INTO THE HILLSIDES ABOVE THE CITY.

| O'NEAL

# HELMET ROTATIONAL IMPACT ABSORPTION TECHNOLOGY FROM O'NEAL

## IPX® ACeLLs.

Welcome to the next generation of helmet safety – IPX® ACeLLs rotational impact absorption technology. It is designed to reduce head injuries caused by rotational and low-speed impacts.

The **IPX® Absorption Cells (ACeLLs)** use a specially engineered polymer foam, developed to make our helmets some of the safest on the market in the event of a crash.

Every part of each individual **IPX® ACeLLs** has been specifically engineered to work together to provide the ultimate in crash protection:

### FLEX-SYSTEM & PENTA-GEOMETRY

Guarantees instant reaction to rotational impacts and enables the ACeLLs to deform depending on the direction of rotational forces to minimize head injuries.

PENTA-GEOMETRY

NORMAL POSITION

MOVING RIGHT

MOVING LEFT

### INJECTED ANTI-FRICTION DISC, LOW-SPEED-IMPACT-ABSORPTION & FLEXIBLE CORE

The soft and flexible polymer material helps to protect against forces caused by low speed impacts. It absorbs these forces before the EPS (expanded polystyrene) performs its function at higher speed to protect against bigger impacts.

INJECTED ANTI-FRICTION DISC

FLEXIBLE-CORE

**IPX® ACeLLs** are designed to reduce head injuries caused by rotational and low-speed impacts during crashing. Pre-installed in O'NEAL's premium helmets and as option to install after-market for various MX and MTB helmets.

- **RACE-READY: IPX® ACeLLs** do not affect the fitting of the helmet liner. Helmets with **IPX® ACeLLs** do not bounce or move on the head during riding.
- **ENHANCED-FOREHEAD-PROTECTION:** The positioning of **IPX® ACeLLs** enhances the performance for direct or oblique frontal impacts, using lots of individual components and positioning them more towards the front of the helmet.

# PRODIGY PANTS

## FEATURES:

1. Durable and lightweight denier fabrics with carefully integrated stretch panels
2. Ergonomic pre-curved leg design conforms to the ideal riding position
3. Lightweight rubber patches at knee with integrated air-intake for cooling
4. Silicone Lined edge, laser cut perforation in critical areas keeping you cool and dry
5. 360-degree adjustable belt keeps pants in place
6. External hidden zippered hip pocket
7. Silicone printing on the inner waistband with soft feel technology
8. Genuine Drum Dyed leather inner knee protection, with padded knee area
9. 900 denier rear saddle with Quilted cross-stitched seat padding for added comfort and grip
10. Triple stitched in critical areas for durability
11. Ultra-soft no pull half liner, stops at the knee
12. 4-way-stretch knees with 2-way stretch calves, sized for knee brace compatibility

# MAYHEM PANTS

## FEATURES:

1. Streamlined and lightweight design
2. Sublimated graphics for reduced weight and increased mobility
3. Durable denier fabrics with triple stitching in all critical areas
4. Premium leather heat shield on both knees
5. Ultra soft no pull half liner, stops at the knee
6. 360-degree belt (V.23)
7. Hidden external zippered hip pocket
8. Stretch panels in key points on front, back, and knees for great freedom of movement
9. Ergonomically correct, pre-bent and padded knee area

# ELEMENT PANTS

## FEATURES:

1. Heavy duty but lightweight denier fabrics provide the perfect combination of comfort and protection while riding
2. Durable, wear-resistant panels in critical areas
3. Premium canvas heat shield on both knees
4. Stretch panels in key points on the front, back, and knees of pants for great freedom of movement
5. Elastic waist with an adjustable ratchet closure system for a secure and snug fit
6. Protective rubber patches for extra protection
7. Opened lower leg to prevent bunching in boot
8. Fully lined for added comfort

ELASTIC

3. Lightweight upper construction with a durable co-injected shin plate for optimum protection
4. Soft technical gaiter keeps water and dirt out of the boot
5. A comfortable and durable boot with a breathable and waterproof membrane.
6. Soft and comfortable inner lining with 3D mesh assures a superb comfort and ventilation
7. TPU foot shell (incorporating heel, ankle and toe areas) is highly resistant to the impacts and adds to the boot overall stability
8. Secure fit with hook and loop flap closure and 2 adjustable buckles
9. Durable TPU components on heel, ankle and toe area for maximum protection and stability
10. Reinforced shifting area
11. Molded and comfortable inner ankle padding to prevent impacts and to offer superb comfort
12. Ergonomically pre-shaped soft PU footbed, designed for a superior comfort and additional damping
13. Heat resistant inner burn guard made by technical suede microfiber
14. The SIERRA PRO boot is certified with European standard EN13634-2017

# RCX URBAN SHOE

Leisure shoe designed for touring and urban use, as well as an all-day casual look

## CONSTRUCTION

1. Protection with reinforced toe and heel areas and improved comfort with rigid nylon inserts anatomically shaped for a better ankle protection
2. High grip rubber sole with differentiated design for motorcycle and urban use
3. Suede upper with water-repellent treatment plus inserts in soft, lightweight, breathable canvas

## ADDED COMFORT WHILE RIDING

4. Optimum comfort with an eco-friendly leather collar lining
5. Added comfort on the ankle with a soft collar padding
6. Ideal ventilation with perforated inner lining
7. Anatomical and removable foot bed made from shock absorbing material

# LIST OF FEATURES

Product	Category	Feature	Description
MX Helmets	Closure system		The Double D closure uses two D-shaped metal rings, one with a hook and the other with a loop, to secure the chin strap. This closure system is known for its simplicity, reliability, and strength, providing a secure and adjustable fit for the wearer.
			Microlock is an easy to operate ratchet chin strap closure with precise adjustment and secure fit
	Special technology		twICEme is a small chip integrated in your safety equipment. It can store all your important personal informations and can make you safer by providing this information at the right time in case of an emergency.
			IPX® ACCells are strategically placed alongside the EPS of the helmet and designed to reduce head injuries caused by rotational- and low speed impacts during crashing.
			Bluetooth recess inside of the helmet for an optional use of a small generic head set device (Device not included and not available at ONEAL)
			Emergency Quick Release System for helmet cheek pads allows for swift and effortless removal of the cheek pads during emergency situations, enabling prompt helmet removal without compromising the wearer's safety. This feature aids first responders in efficiently accessing the rider's head, providing necessary medical attention or facilitating the helmet removal process in a way that minimizes the risk of exacerbating any potential injuries.
	Shell construction		The outer shell is made of Acrylonitrile Butadiene Styrene (ABS) material, offering ideal protection and strength
		Fiberglass	The lightweight outer shell is made of fiberglass and offers excellent impact resistance and strength
			The lightweight outer shell is made of carbon fiber. The shell is extremely strong with excellent impact resistance and offers a perfect strength-to-weight ratio with enhanced protection
			The inmold technology involves fusing the outer shell and the EPS together creating a single, integrated structure. It offers excellent impact protection and ventilation with a minimum weight
	Liner		Coolmax fabric offers exceptional moisture-wicking capabilities, pulling sweat away from the body and promoting quick evaporation, keeping the wearer cool and dry during physical activities. Its lightweight and breathable nature adds to the overall comfort, making it a popular choice for athletic apparel.
			Dri-Lex fabrics are antimicrobial and offer excellent moisture management properties. It effectively wicks away perspiration from the skin, promoting quick evaporation and keeping the wearer dry and comfortable during physical activities
			Polygiene is an innovative technology that offers odor control and freshness to fabrics. It utilizes silver chloride to inhibit the growth of odor-causing bacteria and fungi, keeping garments smelling fresh for longer periods without the need for frequent washing. Polygiene-treated fabrics are ideal for active wear, socks, and other clothing items where odor management is desired.

Product	Category	Feature	Description
MX Helmets	Visor/Shield		Break-away-screws are specifically design to break after an impact on the visor of the helmet. By braking away forces to the head are reduced. It provides additional safety in case of a crash.
			
			Additional internal visor underneath the main visor ensures perfect visibility in bright and sunny conditions
			Adjustable positions
	Special Features		Easy operating click in device to securely fix your hydration hose on your helmet
			
		Rubber roost nose guard	
		Reflective sticker	
	Certification		ECE 22.06 is an update to the previous version, ECE 22.05, and it defines the technical specifications for motorcycle helmets in terms of their construction, performance, and labeling. The regulation covers various aspects, including direct- and rotational impact absorption, retention system effectiveness, field of vision, visor performance, and more.
		DOT	DOT approved refers to a certification given to helmets that meet the safety standards set by the Department of Transportation in the United States, indicating that the helmet meets the required criteria for performance and protection in motorcycle riding situations.
		ACU	ACU gold sticker mean the helmet meets the safety standards set by the Auto Cycle Union (ACU) for motorcycle racing in UK

# LIST OF FEATURES

Product	Category	Feature	Description
Soft gear	Construction	 WITH HOOD	With hood
		 TAGLESS NECK DESIGN	Tagless neck design
		 INFINITY	Infinity collar and cuff design for ultimate comfort and performance
		 ZIPPED POCKETS	Hidden secure side back pocket in seam with zipper closure. Handy for stashing key, bank card, lift pass, etc
		 O'NEAL MIB INNER SHORT COMPATIBLE	Optional extra to provide an inner short complete with comfortable, contoured, breathable chamois pad for extra comfort when riding
		Ratchet closure	Elastic waist with adjustable ratchet closure system. For a secure and comfortable fit
		 360°	360-degree adjustable belt. Even pressure around the entire waist for optimum fit and comfort
		 RUBBER PATCHES	Rubber patches. Additional rubber applications for enhanced protection
		 LEATHER HEAT SHIELD	Leather heat shield
	Material	 390g (+25)	Lightweight
		 F500LIFE	Durable and lightweight denier fabrics
		 STRETCH	4-way-stretch for increased freedom-of-movement and comfort while riding
		 ELASTIC	elastic material
		 MOISTURE-WICKING	Fast-wicking material. To remove perspiration moisture away from the skin for increased comfort while riding
		Breathable	Breathable material to allow perspiration moisture escape for increased comfort while riding

Product	Category	Feature	Description
Soft Gear	Material		Mesh panels for extra ventilation and comfort
			Quick-drying material to maintain comfort levels after rain fall and perspiration
			Laser cut venting to promote airflow and cooling along with perspiration moisture escape for increased comfort while riding
			Windproof
			Waterrepellent
			Waterproof
			Material for added warmth while riding in colder conditions
	special features		Built-in goggle/ sunglasses wipe. Located on the inside of the front hem to keep clean and dry while riding and allowing easy wiping of goggles and sunglasses when stopped
			Silicone printing on the inside of waistband. To help grip the jersey when tucked in and prevent it coming out when riding
			Reflective print for more safety while riding in the dark
Shoes	Construction		SPD cleat compatible
			Quick-lace-system. Single-handed pull cord for easy and quick fastening and release
			Hook-and-loop mud flap. Complete coverage of the lacing area for secure closure and protection from mud and water
			Micro-adjustable ratchet lacing system. For precise and customizable fit, easy adjustability on the go with even pressure distribution for improved comfort and performance as well as quick-release unfastening
	Foot-bed		Lightweight, removable and washable EVA footbed

# LIST OF FEATURES

Product	Category	Feature	Description
Shoes	Sole		Honey Rubber® Hexagon Adventure outsole for the ultimate traction both on and off the bike
			Thanks to a membrane in the upper construction which keeps water from coming in but at the same time allows perspiration moisture to escape, keeping the feet dry and maintaining a comfortable temperature
			Lycra® ankle gaiter to prevent entry of dirt, debris and cold wind into the shoe for added comfort while riding
MX Boots	Outsole		Stiffness provided by lightweight nylon lasting board with added fiberglass. It offers maximum strength while maintaining flex-abilities
			Integrated steel shank for ultimate safety and stability
	Inner Sole/footbed		Lightweight and removable EVA footbed
			Ergonomically pre-shaped and anti-sweat treated soft PU footbed, designed for a superior comfort and additional damping
	Lining		Waterproof and breathable membrane
			Air mesh fabrics. Increased comfort, enhanced ventilation and moisture-wicking properties by using mesh fabrics
	Upper		Textured microfiber
		Reinforced outside toe area	Enhanced protection with additional plastic toe reinforcements
			A textured forefoot area provide excellent shifting grip without slipping
	Certification		European standard EN13634-2017

Product	Category	Feature	Description
Gloves	Construction		Airprene wrist closure. Comfortable synthetic material with excellent flexibility, durability and breathability
			Ideal individual closure adjustment with hook and loop rubber closure flap
			Rubber patches. Additional rubber applications on outer glove shell for enhanced protection
			Pre-shaped Carbon look Hardshell one-piece knuckle protector incorporated on the outer glove shell
			Seamless rollover fingertips. Maximum comfort without seams on fingertips
	Material		Enhanced comfort and flexibility by using 4-way stretch panels
			Multi-layer Hipora® membrane. Breathable layer, which provides waterproofing and windproofing capabilities while allowing moisture to escape. Keeps your hand dry and comfortable
			Added comfort with vented material
			Cold protection
			Waterproof
	Palm		Durable and flexible synthetic leather palm material for excellent grip and ideal abrasion resistance
			Thin high grip palm material offers unrestricted feel and control and maximum comfort
			Silicone printing on palm provides enhanced grip and a nice look and feel
	Special features		Touchscreen compatible

# LIST OF FEATURES

Product	Category	Feature	Description
Goggles	Construction		Magnetic goggle. Two-piece magnetic goggle with maximum field of vision and easy to operate lens change
	Lens	3D molded lens	Durable and resistant pre-shaped injected lens for maximum impact protection
		100% UV	Blocks harmful ultraviolet rays to protect the eyes from sun damage
			Anti-fog & Anti-scratch coating
			Tear-off pins are mounted on the outside of the lens to incorporate tear-off films
	Special features	Removable nose guard	Easy to apply Nose cover for additional protection on your MX / MTB goggle
	Certification		All products meet the necessary standards for safety, performance, and quality. CE certification for PPE (Personal protective equipment) items involves compliance with specific directives and standards, such as the Personal Protective Equipment Regulation (EU) 2016/425. Depending on the category there are different standards and different protection levels.
		ANSI	Fulfills the standards of the american national standard institute
		EN1938	EN1938 for motorcycle eyewear: Fulfills the specific standard for offroad motorcycles

Product	Category	Feature	Description
Protectors	Construction	Rigid	Hard protection
			IPX® impact protection foam is soft and supple while riding but hardens instantly on impact providing protection in the event of a crash
			Giving the jacket extra versatility to alternate between short sleeved in warmer conditions and long sleeved jacket when colder and/ or when more protection is needed
			Carbon look finish
	Material		To maintain comfort levels after rain fall and perspiration
		Breathable	To allow perspiration moisture escape for increased comfort while riding
			Multiple ventilation holes. To promote airflow and cooling along with perspiration moisture escape for increased comfort while riding
			For increased freedom-of-movement and comfort while riding
	Special features		Neckbrace compatible
	Certification	EN14021	
		EN1621-1 Level 1	
		EN1621-1 Level 2	
		EN1621-2 Level 1	
		EN1621-2 Level 2	
		EN1621-3 Level 1	
		EN1621-3 Level 2	

# NOTES

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
