

ONFIL ~ O DUN

The *IntelliQuin* system equips the user with essential life-saving features including automatic Crash Detection and a manual SOS Beacon. *IntelliQuin* technology accurately and reliably detects dangerous levels of impact experienced by the user, and informs emergency contacts of the situation and crash location. When help is needed on-the-move, IntelliQuin also lets users reach out for help through a manually triggered emergency message to nearest responders. SOS Beacon will share the rider's live location with emergency contacts.

Event Detection & Emergency Alerts

Quin specializes in crash detection for motorcyclists and has been helping riders get help in emergencies since 2018.

For every non-crash emergency, a Quin rider can manually trigger the S.O.S. SOS Beacon will share the rider's live location with emergency contacts.

Helmet Drop Detection

Your smart helmet won't call for help for every drop, ding, or bump. Quin's algorithms identify drops and send you an alert to check your helmet for damage.

Quin provides essential data on every ride to help the user achieve their goals and enjoying their favorite hobby. Quin provides live updates of your status to your emergency contacts.

ADVANCED ANALYTICS

Ride record and performance analytics help create an engaging product experience and keep users coming back to the app for more than just basic configuration and safety even management. The Quin App fosters an exciting relationship with the product, a deeper connection with performance, and a long lasting connection to the activity. Quin's ride analytics include metrics like speed, distance, elevation, sprints, hard braking, rapid acceleration, heart rate range, exertion, and more. Quin provides essential data on every ride to help the user achieve their goals, whether that be less commute time per week, lower average speeds for commutes, or more miles racked up enjoying their favorite hobby.

^{*}To take advantage of the full functionality of your O'Neal Quin Smart Sensor enabled helmet, you need an Apex Premium membership. An initial subscription is included with your helmet purchase. The same membership profile can be used to work with the entire range of the O'Neal Quin Smart Sensor equipped helmets.

MTB SHOES - SPD

THE OUTSOLE

Our SPD Shoes all share the same SPD-compatible outsole.

With a full-length shank inside the sole the SPD range is stiffer from front to back than the Flat range to help with transfer of power from legs to pedals and bike. The tread pattern still allows for easy walking off the bike and also traction on platform SPD pedals even when the clips are not engaged.

Professional riders often comment on the lateral stiffness left to right vs competitor Shoes giving great connection to the bike and reducing injury risk on hard landings and technical trails.

SESSION SPD

COMFORT:

- 1. 120 oversized side vent perforations
- 2. 100+ toe vent perforations
- 3. Padded tongue and ankle area
- 4. Durable and lightweight PU upper

MAXIMUM SAFETY:

- 5. Velcro closure top-strap
- 6. Reinforced toe cap for added protection

	Closure system	O'Neal Fidlock® magnetic buckle	FIDLOCK	The magnetic Fidlock® buckle system uses a combination of magnets and mechanical locking to secure the helmet's chin strap. It allows for easy one- handed operation, offering quick and convenient fastening and release while maintaining a secure and reliable connection.
		Microlock		Microlock is an easy to operate ratchet chin strap closure with precise adjustment and secure fit
	Size adjustment	3D Multi-Positioning System	- 3D positioning system	Perfect individual fit by using a size adjuster wheel for the head circumstance. Additional height options for an excellent head position
	Safety system	QUIN		Multifunctional Smart sensor for recording and transmitting accident and driving data. More information on <u>page 4 / 5</u> or online: <u>https://www.oneal.eu/en/quin-system</u>
		IPX®	READY	IPX® are strategically placed alongside the EPS of the helmet and designed to reduce head injuries caused by rotational- and low speed impacts during crashing.
		E.Q.R.S	E.Q.R.S.	Emergency Quick Release System for helmet cheek pads allows for swift and effortless removal of the cheek pads during emergency situations, enabling prompt helmet removal without compromising the wearer's safety. This feature aids first responders in efficiently accessing the rider's head, providing necessary medical attention or facilitating the helmet removal process in a way that minimizes the risk of exacerbating any potential injuries.
	Shell construction	ABS	CONSTRUCTION	The outer shell is made of Acrylonitrile Butadiene Styrene (ABS) material, offering ideal protection and strength
		Carbon	CARBON	The lightweight outer shell is made of carbon fiber. The shell is extremely strong with excellent impact resistance and offers a perfect strength-to-weight ratio with enhanced protection
MTB Helmets		Inmold Technology	RMOLD RCHNOLOGY	The inmold technology involves fusing the outer shell and the EPS together creating a single, integrated structure. It offers excellent impact protection and ventilation with a minimum weight
	Visor/Shield	Break-away screw	*	Break-away-screws are specifically design to break after an impact on the visor of the helmet. By braking away forces to the head are reduced. It provides additional safety in case of a crash.
		Height adjustable visor		Adjustable positions
	Special Features	Hydration hose guide	Hydration Hose guide	Easy operating click in device to securely fix your hydration hose on your helmet
		GoPro mount	GoPro*	
	Certification	EN1078		European safety standard for bicycle helmets
		ASTM		ASTM F1952 is an american safety standard for Downhill helmets and was specially tailored to the needs of downhill riders. It is not required by law in europe.
		CPSC		American safety standard for the general bicycle use and is valid for all bicycle helmets sold in USA
