MX PRODUCT GUIDE

IN THE FOOTHILLS OF LOS ANGELES, CA IN THE EARLY 1960'S THINGS WERE A BIT DIFFERENT. THE DECADE OF CHANGE WAS RAPIDLY APPROACHING AND THE LANDSCAPE OF AMERICA WAS QUICKLY TAKING ROOT IN THE VALLEYS AND MOUNTAINS SURROUNDING THE CITY OF ANGELS. IT WAS HERE ALONG THE LOCAL MOUNTAINS AND TRAILS A YOUNG MAN NAMED JIM O'NEAL WOULD RIDE HIS MODIFIED TRIUMPH MOTORCYCLE TO SCHOOL AND WOULD FIND HIMSELF TAKING THE SAME TRIUMPH THROUGH THE DIRT AND TRACKS INTO THE HILLSIDES ABOVE THE CITY.

The *IntelliQuin* system equips the user with essential life-saving features including automatic Crash Detection and a manual SOS Beacon. *IntelliQuin* technology accurately and reliably detects dangerous levels of impact experienced by the user, and informs emergency contacts of the situation and crash location. When help is needed on-the-move, IntelliQuin also lets users reach out for help through a manually triggered emergency message to nearest responders. SOS Beacon will share the rider's live location with emergency contacts.

Event Detection & Emergency Alerts

Quin specializes in crash detection for motorcyclists and has been helping riders get help in emergencies since 2018.

For every non-crash emergency, a Quin rider can manually trigger the S.O.S. SOS Beacon will share the rider's live location with emergency contacts.

Helmet Drop Detection

Your smart helmet won't call for help for every drop, ding, or bump. Quin's algorithms identify drops and send you an alert to check your helmet for damage.

Quin provides essential data on every ride to help the user achieve their goals and enjoying their favorite hobby. Quin provides live updates of your status to your emergency contacts.

ADVANCED ANALYTICS

Ride record and performance analytics help create an engaging product experience and keep users coming back to the app for more than just basic configuration and safety even management. The Quin App fosters an exciting relationship with the product, a deeper connection with performance, and a long lasting connection to the activity. Quin's ride analytics include metrics like speed, distance, elevation, sprints, hard braking, rapid acceleration, heart rate range, exertion, and more. Quin provides essential data on every ride to help the user achieve their goals, whether that be less commute time per week, lower average speeds for commutes, or more miles racked up enjoying their favorite hobby.

^{*}To take advantage of the full functionality of your O'Neal Quin Smart Sensor enabled helmet, you need an Apex Premium membership. An initial subscription is included with your helmet purchase. The same membership profile can be used to work with the entire range of the O'Neal Quin Smart Sensor equipped helmets.

			The Double D closure uses two D-shaped metal rings, one with a hook and the other with a loop, to secure the chin strap. This closure system is known for its simplicity, reliability, and strength, providing a secure and adjustable fit for the wearer.
	Closure system		Microlock is an easy to operate ratchet chin strap closure with precise adjustment and secure fit
		READY READY	Multifunctional Smart sensor for recording and transmitting accident and driving data. More information on page 4/5 or online: https://www.oneal.eu/en/quin-system
		twlCEme	twICEme is a small chip integrated in your safety equipment. It can store all your important personal informations and can make you safer by providing this information at the right time in case of an emergency.
	Special technology	READY	IPX [®] are strategically placed alongside the EPS of the helmet and designed to reduce head injuries caused by rotational- and low speed impacts during crashing.
	special technology	BLUETOOTH	Bluetooth recess inside of the helmet for an optional use of a small generic head set device (Device not included and not available at ONEAL)
		E.Q.R.S.	Emergency Quick Release System for helmet cheek pads allows for swift and effortless removal of the cheek pads during emergency situations, enabling prompt helmet removal without compromising the wearer's safety. This feature aids first responders in efficiently accessing the rider's head, providing necessary medical attention or facilitating the helmet removal process in a way that minimizes the risk of exacerbating any potential injuries.
	Shell construction	ABS	The outer shell is made of Acrylonitrile Butadiene Styrene (ABS) material, offering ideal protection and strength
MX Helmets		Fiberglass	The lightweight outer shell is made of fiberglass and offers excellent impact resistance and strength
		CARBON	The lightweight outer shell is made of carbon fiber. The shell is extremely strong with excellent impact resistance and offers a perfect strength-to-weight ratio with enhanced protection
		AMICLO TECHNOLOGY	The inmold technology involves fusing the outer shell and the EPS together creating a single, integrated structure. It offers excellent impact protection and ventilation with a minimum weight
	Liner		Coolmax fabric offers exceptional moisture-wicking capabilities, pulling sweat away from the body and promoting quick evaporation, keeping the wearer cool and dry during physical activities. Its lightweight and breathable nature adds to the overall comfort, making it a popular choice for athletic apparel.
		DRI-LEX®	Dri-Lex fabrics are antimicrobial and offer excellent moisture management properties. It effectively wicks away perspiration from the skin, promoting quick evaporation and keeping the wearer dry and comfortable during physical activities
		POLYGIENE	Polygiene is an innovative technology that offers odor control and freshness to fabrics. It utilizes silver chloride to inhibit the growth of odor-causing bacteria and fungi, keeping garments smelling fresh for longer periods without the need for frequent washing. Polygiene-treated fabrics are ideal for active wear, socks, and other clothing items where odor management is desired.
