ONEAL ∞ QUIN™

QUIN™
READY

The **IntelliQuin** system equips the user with essential life-saving features including automatic Crash Detection and a manual SOS Beacon. **IntelliQuin** technology accurately and reliably detects dangerous levels of impact experienced by the user, and informs emergency contacts of the situation and crash location. When help is needed on-the-move, IntelliQuin also lets users reach out for help through a manually triggered emergency message to nearest responders. SOS Beacon will share the rider's live location with emergency contacts.

Event Detection & Emergency Alerts

Quin specializes in crash detection for motorcyclists and has been helping riders get help in emergencies since 2018.

SOS Beacon

For every non-crash emergency, a Quin rider can manually trigger the S.O.S. SOS Beacon will share the rider's live location with emergency contacts.

Helmet Drop Detection

Your smart helmet won't call for help for every drop, ding, or bump. Quin's algorithms identify drops and send you an alert to check your helmet for damage.

Ride Record

Quin provides essential data on every ride to help the user achieve their goals and enjoy their favorite hobby.

Live Updates

Quin provides live updates of your status to your emergency contacts.

ADVANCED ANALYTICS

Ride record and performance analytics help create an engaging product experience and keep users coming back to the app for more than just basic configuration and safety even management. The Quin App fosters an exciting relationship with the product, a deeper connection with performance, and a long lasting connection to the activity. Quin's ride analytics include metrics like speed, distance, elevation, sprints, hard braking, rapid acceleration, heart rate range, exertion, and more. Quin provides essential data on every ride to help the user achieve their goals, whether that be less commute time per week, lower average speeds for commutes, or more miles racked up enjoying their favorite hobby.

*To take advantage of the full functionality of your O'Neal Quin Smart Sensor enabled helmet, you need an Apex Premium membership. An initial subscription is included with your helmet purchase. The same membership profile can be used to work with the entire range of the O'Neal Quin Smart Sensor equipped helmets.
