**HELMETS » SAFETY »** O'NEAL QUIN INTELLIGENT SAFETY TECHNOLOGY

# Automatically calls for help when you're no longer able to do so.

O'NEAL Helmets are now equipped with QUIN's intelligent safety technology. This technology means that vital help is on the go, even if you can't call it. Your emergency contacts will be automatically alerted. The emergency centre receives the alert and sends help immediately.\*

You only need the QUIN device and the app.

**EXPLORE NOW:** 

www.oneal.eu/auin-system

The design of the device might change and is not final yet.

## FEATURES OVERVIEW

### EMERGENCY QUICK RELEASE SYSTEM

E.Q.R.S for helmet cheek pads allows for swift and effortless removal of the cheek pads during emergency situations, enabling prompt helmet removal without compromising the wearer's safety. This feature aids first responders in efficiently accessing the rider's head, providing necessary medical attention or facilitating the helmet removal process in a way that minimizes the risk of exacerbating any potential injuries.

### ROTATIONAL IMPACT SYSTEM

IPX® are strategically placed alongside the EPS of the helmet and designed to reduce head injuries caused by rotational- and low speed impacts during crashing.

#### FIDLOCK® MAGNETIC CLOSURE

The magnetic Fidlock® buckle system uses a combination of magnets and mechanical locking to secure the helmet's chin strap. It allows for easy onehanded operation, offering quick and convenient fastening and release while maintaining a secure and reliable connection.

### HYDRATION HOSE GUIDE

Easy operating click in device to securely fix your hydration hose on your helmet.

#### BREAK-AWAY SCREWS

Break-away-screws are specifically designed to break after an impact on the visor of the helmet. By breaking away forces to the head are reduced. It provides additional safety in case of a crash.

#### CARBON CONSTRUCTION

The lightweight outer shell is made of carbon fiber. The shell is extremely strong with excellent impact resistance and offers a perfect strength-to-weight ratio with enhanced protection.

### GOPRO® MOUNT

The GoPro® Mount allows you to attach all devices with a GoPro® adapter directly.

The mount is screwed directly to the designated mount to ensure a stable attachment.

It's flexibly adjustable to find the optimum recording angle for rides and centrally positioned.

#### QUIN SMART SAFETY SENSOR INSTALLATION

Multifunctional Smart sensor for automatic emergency call, recording, transmitting accident and driving data.

## OCEAN YARN

Ocean Yarn is a sustainable material created from recycled ocean plastic, aimed at reducing marine pollution and promoting eco-friendly practices. Ocean Cycle plays a crucial role by certifying the origin of the plastic, ensuring it is ethically sourced and recycled. Their certification guarantees traceability, transparency, and responsible recycling efforts throughout the process.

## RECYCLED TIRE

Recycling old car tires through pyrolysis involves heating them in the absence of oxygen to break them down into useful materials like oil, gas, and carbon black. The recovered carbon black can be refined and used to create polyester or blended fibers, which are then spun into fabrics for clothing production. This process transforms waste tires into sustainable fashion materials.

## *NATURE*

TENCEL™ is a sustainable fabric made from wood fibers, primarily sourced from eucalyptus, beech, or spruce trees. The process involves dissolving the wood pulp in a non-toxic solvent to produce cellulose fibers, which are then spun into yarn. TENCEL™ is eco-friendly because it uses sustainably harvested wood, requires less water and energy than traditional fabrics, and the closed-loop production system recycles 99% of the solvent, minimizing waste and emissions.

## T8 MECHANICAL STRETCH FABRICS

Enhanced Comfort: Mechanical stretch fabrics offer natural stretch without spandex, providing freedom of movement, perfect for active and casual wear. Flexibility: High twist yarns and heat-setting ensure flexibility while maintaining shape and stability. Durability: More durable and resistant than spandex fabrics, with no elastic fibers to degrade over time. Environmental Benefits: Eco-friendlier, as they avoid synthetic elastic fibers, reducing environmental impact.

RACING PERFORMANCE

## FEATURESOVERVIEW

## FAST-WICKING MATERIALS

Fast-wicking material to maintain comfort levels after rain fall and perspiration.

## ZIPPED POCKETS

Hidden secure side back pocket in seam with zipper closure. Handy for stashing key, bank card, lift pass, etc.

## LASER-CUT VENTILATION

Laser-cut venting to promote airflow and cooling along with perspiration moisture escape for increased comfort while riding.

## RECYCLED MATERIALS

Recycled materials help reduce waste, save energy, and lower carbon emissions. By reusing resources, we protect natural habitats and decrease pollution. Choosing recycled products is a simple way to support a greener future. See Conscious Collection on page 46.

## STRETCHING MATERIALS

4-way-stretch for increased freedom-of-movement and comfort while riding.

## GOGGLE/ SUNGLASSES WIPE

Built-in goggle/ sunglasses wipe. Located on the inside of the front hem to keep clean and dry while riding and allowing easy wiping of goggles and sunglasses when stopped.

MTB VEST PRO

BREEZE WP

# RAINWEAR

### **TSUNAMI**

### **SHORE**

TORRENT

### FEATURES OVERVIEW

### WATERPROOFING

Waterproof rain gear protect riders from rain by using waterproof fabrics and sealed seams to block water. These features ensure you stay dry and comfortable, even in heavy downpours.

### WATER-REPELLENT FABRIC

Water-repellent fabric offers excellent protection against light rain, causing water to bead up and roll off easily. It's lightweight and breathable, making it ideal for short rides or mild weather conditions.

WATER-REPELLENT FABRIC

### MESH PANELS

Mesh panels provide extra ventilation by allowing air to flow freely, keeping you cool during intense rides. They're perfect for preventing overheating, especially in warm or humid conditions.

### SIZE ADJUSTMENT

Size adjustment features, like adjustable straps or elastic cuffs, ensure a snug and comfortable fit. They enhance performance by keeping gear secure and reducing wind resistance while riding.

HAND-WARMER POCKETS

### HANDWARMER POCKETS

Handwarmer pockets provide a cozy space to keep your hands warm during cold rides. They're also great for storing small essentials within easy reach.

### BREATHABLE FABRICS

Breathable material to allow perspiration moisture escape for increased comfort while riding.

RAINWEAR » JACKETS & PANTS » BREEZE WP

PINNED FLAT

PINNED PRO FLAT

### FEATURES OVERVIEW

» MTB SHOES - FLAT

### FLAT: THE OUTSOLE

All FLAT Shoes have our Honey Rubber® Hexagon outsole: Designed to deliver the perfect balance between traction when you need it most and the ability to repositioned your feet on even the gnarliest of trails. Compared to our SPD shoes the FLAT range have more flexible soles to increase traction on the pedals, providing the perfect balance between grip, power transfer and foot repositioning.

### FLAT: MATERIALS AND CONSTRUCTION

All FLAT Shoes have a durable and lightweight PU upper and include features that offer the ultimate balance between comfort and durability.

### FLAT: VENTILATION AND COOLING

All FLAT Shoes have perforations in the uppers allowing moisture escape and cooling but still preventing water ingress. Lycra® ankle gaiter to prevent entry of dirt, debris and cold wind into the shoe for added comfort while riding.

### FLAT: LACING

The laces are designed not to absorb water quickly and to slide more easily to assist tying and untying. Hook-and-loop mud flap for complete coverage of the lacing area for secure closure and protection from mud and water.

### » MTB SHOES - SPD

### SPD: THE OUTSOLE

With a full-length shank inside the sole the SPD range is stiffer from front to back than the Flat range to help with transfer of power from legs to pedals and bike. The tread pattern still allows for easy walking off the bike and also traction on platform SPD pedals even when the clips are not engaged. Professional riders often comment on the lateral stiffness left to right vs competitor Shoes giving great connection to the bike and reducing injury risk on hard landings and technical trails.

### SPD: MATERIALS AND CONSTRUCTION

All SPD Shoes have a durable and lightweight PU upper and include features that offer the ultimate balance between comfort and durability. SPD cleat compatible.

### SPD: VENTILATION AND COOLING

All SPD Shoes have perforations in the uppers allowing moisture escape and cooling but still preventing water ingress. In addition as you move up the range there are additional features to promote this and increase on-bike comfort and performance.

### SPD: LACING

The PINNED SPD features Easy-glide non-absorbing laces for individual fitting to every foot. Quick-lace-system with single-handed pull cord for easy and quick fastening and release.

# FEATURES OVERVIEW

### MAGNETIC LENS

Magnetic goggle. Two-piece magnetic goggle with maximum field of vision and easy to operate lens change. Magnetic Lens with Smart Outrigger Locking mechanism for Lens Fixation - pat pending

## TEAR-OFF PINS

Tear-off pins are mounted on the outside of the lens to incorporate tear-off films, which are transparent, removable layers protect the main lens from dirt and debris, and can be quickly peeled off during use to restore clear vision.

## ANTI-FOG & ANTI-SCRATCH COATING

Anti-fog and anti-scratch coatings prevent fogging and protect goggles from scratches. The anti-fog coating ensures clear vision in humid conditions, while the anti-scratch coating increases the durability of the lenses.

## LIMITED RUN

Please be informed that this product is only available while current stock lasts. Once the existing inventory is fully sold, it will no longer be possible to place additional orders.

### NOSE EMBOSSING

Nose embossing refers to the raised or contoured design added to goggles around the nose area. This feature improves comfort and fit by providing better contact with the face, helping to create a secure seal and reduce pressure points.

## REMOVABLE NOSE GUARD

Easy to apply nose cover for additional protection on your goggle.

## CE STANDARD

All products meet the necessary standards for safety, performance, and quality. CE certification for PPE (Personal protective equipment) items involves compliance with specific directives and standards, such as the Personal Protective Equipment Regulation (EU) 2016/425. Depending on the category there are different standards and different protection levels.

## **B-55**

### **GREAT CONCEPT:**

- 1. All new premium MX/MTB magnetic concept Goggle
- 2. Easy to handle and secure lock double-lens
- 3. Modern look and feel with 50mm wide strap
- 4. Minimalistic and modern frame design for maximum field of vision & perfect ventilation

### **FEATURES & SAFETY:**

- 5. Maximum safety and durability with high impact resistant 1,8mm injected polycarbonate double lens
- 6. Enhanced field of view
- 7. Anti-scratch & Anti-fog
- 8. All lenses are 100% UV filtering
- 9. Frame construction including extended outriggers for perfect and ergonomic fit
- 10. Secure fit with size-adjustable goggle strap and silicone application
- 11. Triple layer profiled foam with embossed nose recess for unrestricted breathing, optimum comfort and ideal moisture wicking
- 12. Tear-off pins integrated
- 13. Removable nose guard included
- 14. Spare double lenses available in clear, gray, yellow, silver mirror, radium red, radium blue and radium gold
- 15. Meets standard EN1938 for motorcycle eyewear and exceeds all ANSI norms
- 16. Safe storage with the supplied goggle bag

# FEATURES OVERVIEW

# SLIP ON ENTRY

Slip On Entry gloves feature a lightweight design that allows for easy on and off without a ratchet mechanism. This advanced construction ensures a comfortable fit and quick access, making them convenient for various tasks.

# TPR PATCHES

Additional rubber applications on outer glove shell. TPR Patches are lightweight, high-performance components made from thermoplastic rubber, providing excellent durability and flexibility. They are abrasion-resistant, waterproof, and offer a secure grip.

# NANOFRONT PALM MATERIAL

Thin high grip palm material offers unrestricted feel and control and maximum comfort. Nanofront Palm is a lightweight, high-performance material made from ultra-fine fibers, providing superior grip and touch sensitivity. It's durable, moisture-wicking, and resistant to wear. Its advanced technology ensures a comfortable fit while maintaining performance in various conditions.

# DS NASH PALM MATERIAL

DS Nash Palm is a durable, lightweight material made from palm fibers. It offers excellent grip, moisture resistance, and eco-friendly properties, making it a popular choice for high-performance gloves and equipment.

### BREATHABLE FABRIC

Breathable fabrics are lightweight materials designed to enhance airflow and moisture management. Their advanced technology ensures comfort by keeping the wearer cool and dry, making them ideal for various activities and climates.

### SEAMLESS CUFF

Seamless cuffs are designed for a comfortable fit without bulky seams, enhancing flexibility and reducing irritation. Their advanced construction provides a sleek look while ensuring optimal performance and ease of movement.

### VENTILATION HOLES

Ventilation holes are strategically placed openings designed to enhance airflow and breathability. Their advanced design improves comfort by promoting moisture management and temperature regulation during various activities.

# ROLLED OVER & SILICON FINGERTIPS

Laser cut venting to promote airflow and cooling along with perspiration moisture escape for increased comfort while riding.

## FEATURES OVERVIEW

### SEAMLESS BONDING

Seamless bonding technology ensures a perfect fit without seams, enhancing comfort and performance. This method eliminates the potential for irritation and friction caused by traditional seams, providing a smoother, more integrated feel that adapts seamlessly to the wearer's movements.

### ABRASION LAYER

An integrated, ventilated abrasion layer enhances the durability of the protection against wear and tear. This feature not only improves the longevity of the protective gear but also ensures better air circulation.

### HIGH ELASTICITY

The garment features high elasticity, enabling a perfect fit that is super stretchable to improve comfort. This adaptability ensures full freedom of movement without sacrificing support or durability.

### ULTRATHIN

Ultrathin protectors are designed to maximize flexibility and elasticity, allowing the protective pads to conform seamlessly to the body's movements.

### LEVEL I

The protector pads are certified to meet the EN 1621 Level I standard, which is the second-highest level of impact protection. This certification guarantees that the pads provide excellent impact absorption and adhere to rigorous safety benchmarks.

### NON NEWTONIAN

The pad incorporates non-Newtonian dilatants, which enable the protective material to stiffen upon impact while remaining soft when not under stress. This smart material design allows for pads that are flexible and adapt their microstructure in response to impacts, providing dynamic comfort and enhanced protection.

### IMPACT TPE GEL

TPE shock-absorbing materials can be recycled and offer premium, slim protection without compromising safety, as proven by our laboratory testing.

### OLEFINE BASED FOAM

Molded 3D olefin-based foams are a greener solution than PU foams, offering riders light-weight protection. These foams can be worn directly on the skin.

### LEVEL II

The protector pads meet the EN 1621 Level II standard, the highest level of impact protection available. This certification ensures that the pads provide superior impact absorption and safety in accordance with rigorous industry benchmarks.

### **BIKE » PROTECTION »** IPX

**Intelligent Protection** (IPX) works with the rider, constantly adapting to both body and surrounding temperatures to provide the ultimate protection when you need it most. Whilst riding **IPX®** becomes soft and supple, molding to the rider's body, providing 100% coverage of the area being protected and allowing the rider to manoeuvre with full freedom of movement.

THE NEXT LEVEL

## OF IMPACT PROTECTION

In the event of a crash the IPX® impact foam instantly hardens on impact, providing protection against injury and minimizing the risk of permanent damage. IPX® then returns to its soft and supple pre-crash state and can be crashed repeatedly without compromising the structure and effectiveness of the foam.

Developed over a 2 year period, working with leading materials specialists and top DH and MX riders, this new impact foam technology offers unsurpassed levels of protection whilst maintaining freedom of movement, comfort and dexterity when riding.

Exceeding CE EN1621-3 standards for motorcycle protection.

Independent testing was conducted by Ricotest, together with DolomitiCert, the leading laboratory in Europe, who are responsible for testing many of the leading brands of protection on the market.
