IN THIS BOOK YOU WILL FIND CONFIDENTIAL INFORMATION ON OUR 2027 MOTO O'NEAL PRODUCT LINE.

WHILE THIS BOOK CONTAINS THE MAJORITY OF NEW PRODUCTS WITHIN THE LINE, ADDITIONAL ITEMS MAY BE ADDED AT A LATER DATE.

PRICING, AS WELL AS FINAL PRODUCT COLORWAYS, MAY BE SUBJECT TO CHANGE. ANY CHANGE WILL BE PROVIDED TO YOU IN WRITING WITH AS MUCH ADVANCE NOTICE AS POSSIBLE.

PROVIDING O'NEAL WITH YOUR PRE-BOOK ALLOWS YOU TO RECEIVE SPECIAL PRICING PROGRAMS. FURTHER, YOUR PRE BOOK ORDER ASSURES YOUR FULFILLMENT WHEN THE NEW 2027 LINE IS RELEASED. WE THANK YOU FOR YOUR CONTINUED BUSINESS AND SUPPORT!

IN CASE OF ANY QUESTIONS, PLEASE DO NOT HESITATE TO CONTACT YOUR O'NEAL REPRESENTATIVE.

THANK YOU FOR CHOOSING

Automatically
calls for help
when you're no longer
able to do so.

O'NEAL helmets now come with **QUIN's intelligent safety technology** ensuring help is on the way, even when you can't call for it. In the event of an accident, your emergency contacts are automatically notified, and the emergency centre is alerted to send help immediately.* All you need is the **QUIN device** and the app

OFFROAD HELMET RANGE

EX-SRS ENDURO

3SRS ADULT & YOUTH ADVANCED

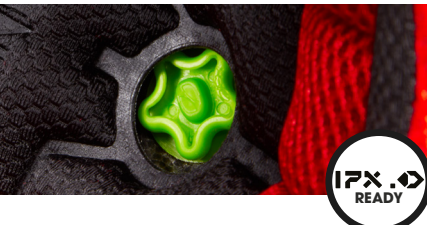

2SRS INTERMEDIATE

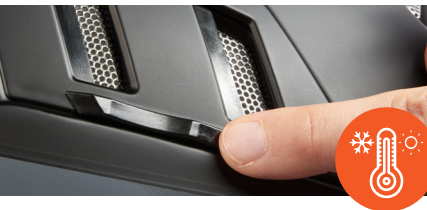

1SRS ADULT & YOUTH ENTRY-LEVEL

EMERGENCY QUICK RELEASE SYSTEM
E.Q.R.S. emergency cheek pad system allows quick, safe cheek pad removal for easier helmet removal in emergencies, aiding first responders and reducing risk of further injury.

ROTATIONAL IMPACT SYSTEM
IPX® are strategically placed alongside the EPS of the helmet and designed to reduce head injuries caused by rotational- and low-speed impacts during crashing.

VENTILATION
Adjustable and closable ventilation channels for individual airflow.

HYDRATION HOSE GUIDE
Easy-to-operate click-in device to securely fix your hydration hose on your helmet.

AIRFLAPS™
AIRFLAPS™ increases ventilation by lifting the Goggle off the face. Maximum airflow without sacrificing protection with simple installation with 3M double face fixation. They can be operated single-handed during riding and is compatible with any MX Goggle. The distance between Goggle & face can be adjusted up to 10mm.

BREAK-AWAY SCREWS
Break-away screws are specifically designed to break after an impact on the visor of the helmet. By breaking away, the forces to the head are reduced. It provides additional safety in case of a crash.

GOPRO® MOUNT
The GoPro® Mount allows you to attach all devices with a GoPro® adapter directly. The mount is screwed directly to the designated mount to ensure a stable attachment. It's flexibly adjustable to find the optimum recording angle for rides and centrally positioned.

QUIN SMART SAFETY SENSOR INSTALLATION
Multifunctional Smart sensor for automatic emergency call, recording, transmitting accident and riding data. More information on page 3 or online: <https://www.oneal.eu/en/quin-system>

BLUETOOTH-READY
There are pre-formed cutouts for optional speakers in the ear area (Bluetooth device not included).

FEATURES OVERVIEW

TEAR-OFF PINS
INTEGRATED IN
LENS

TEAR-OFF PINS

Tear-off pins are mounted on the outside of the lens to incorporate tear-off films, which are transparent, removable layers, protect the main lens from dirt and debris, and can be quickly peeled off during use to restore clear vision.

ANTI-FOG
ANTI-SCRATCH
COATING

ANTI-FOG & ANTI-SCRATCH COATING

Anti-fog and anti-scratch coatings prevent fogging and protect goggles from scratches. The anti-fog coating ensures clear vision in humid conditions, while the anti-scratch coating increases the durability of the lenses.

CE
CERTIFIED

CE STANDARD

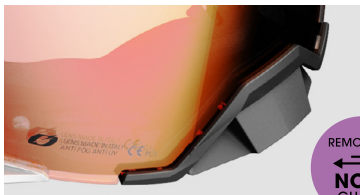

All products meet the necessary standards for safety, performance, and quality. CE certification for PPE (Personal protective equipment) items involves compliance with specific directives and standards, such as the Personal Protective Equipment Regulation (EU) 2016/425. Depending on the category there are different standards and different protection levels.

NOSE
EMBOSSING

NOSE EMBOSSING

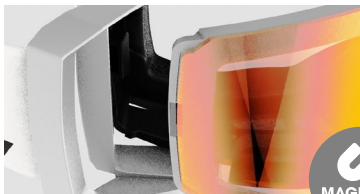

Nose embossing refers to the raised or contoured design added to goggles around the nose area. This feature improves comfort and fit by providing better contact with the face, helping to create a secure seal and reduce pressure points.

REMOVABLE
NOSE
GUARD

REMOVABLE NOSE GUARD

Easy to apply nose cover for additional protection on your goggle.

MAGNETIC
LENS

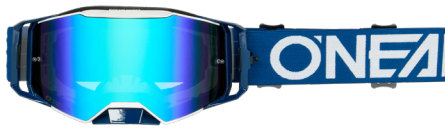

MAGNETIC LENS

Two-piece magnetic goggle with a maximum field of vision and an easy-to-operate lens change. Magnetic lens with Smart Outrigger locking mechanism for secure lens fixation. Patent pending.

CONCEPT

1. All new premium MX magnetic concept Goggle
2. Easy to handle and secure lock double-lens
3. Modern look and feel with 50mm wide strap
4. Minimalistic and modern frame design for maximum field of view & perfect ventilation

FEATURES & SAFETY

5. Maximum safety and durability with high impact resistant 1,8 mm injected polycarbonate double lens
6. Enhanced field of view
7. Anti-scratch & Anti-fog
8. All lenses offer 100% UV protection
9. Frame construction including extended outriggers for perfect and ergonomic fit
10. Secure fit with size-adjustable goggle strap and silicone application
11. Triple layer profiled foam with embossed nose recess for unrestricted breathing, optimum comfort and ideal moisture wicking
12. Tear-off pins integrated
13. Removable nose guard included
14. Spare double lenses available in clear, gray, yellow, silver mirror, radium red, radium blue and radium gold
15. Meets standard EN1938 for motorcycle eyewear and exceeds all ANSI norms
16. Safe storage with the supplied goggle bag

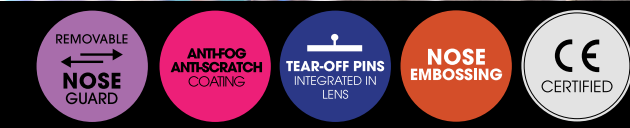

B-33

CONCEPT

1. All-new MX goggle for high-performance riding
2. Base concept & lens sharing with B-22
3. Easy lens exchange via outtrigger locking mechanism
4. Minimalistic modern frame with wide field of vision
5. 50 mm strap with modern design
6. Optimized ventilation & airflow

FEATURES & SAFETY

7. 1,8 mm injected polycarbonate lens, high impact resistant
8. Enhanced field of view
9. Anti-scratch & anti-fog coating
10. 100% UV filtering lenses
11. Compatible with 2025 O'NEAL B-22 lenses
12. Frame with extended outriggers for ergonomic fit
13. Adjustable strap with silicone application for secure hold
14. Triple-layer profiled foam with nose recess for comfort & breathability
15. Integrated tear-off pins
16. Removable nose guard included
17. Spare lenses available (clear, gray, yellow, silver mirror, radium red, blue & gold)
18. Meets EN1938 & exceeds ANSI standards
19. Includes goggle bag for safe storage

B-22

CONCEPT

- 1. All-new MX & MTB goggle for highest demands
- 2. Base concept & lens sharing with B-33
- 3. Easy lens exchange via outrigger locking system
- 4. Perforated & regular strap options
- 5. Minimalistic modern frame for maximum field of vision
- 6. Extended ventilation for maximum airflow
- 7. 40 mm strap with modern design

FEATURES & SAFETY

- 8. 1.8 mm injected polycarbonate lens, high impact resistant
- 9. Enhanced field of view
- 10. Anti-scratch & anti-fog coating
- 11. 100% UV filtering lenses
- 12. Compatible with 2025 O'NEAL B-33 lenses

MAYHEM

WINTER WP

PIN-IT SLIP ON

WINTER

ELEMENT

SNIPER ELITE

MATRIX

REVOLUTION
NANOFRONT

PALM-SAVER

FEATURES OVERVIEW

BREATHABLE
FABRICS

BREATHABLE FABRIC

Breathable fabrics are lightweight materials designed to enhance airflow and moisture management. Their advanced technology ensures comfort by keeping the wearer cool and dry, making them ideal for various activities and climates.

SLIP-ON
ENTRY

SLIP ON ENTRY

Slip On Entry gloves feature a lightweight design that allows for easy on and off without a ratchet mechanism. This advanced construction ensures a comfortable fit and quick access, making them convenient for various tasks.

TPR
PATCHES

TPR PATCHES

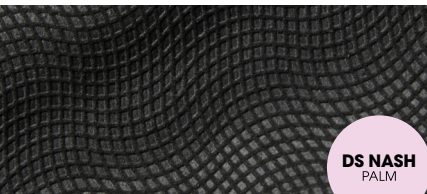

Additional rubber applications on outer glove shell. TPR Patches are lightweight, high-performance components made from thermoplastic rubber, providing excellent durability and flexibility. They are abrasion-resistant, waterproof, and offer a secure grip.

NANOFRONT™
PALM

NANOFRONT PALM MATERIAL

Thin high grip palm material offers unrestricted feel and control and maximum comfort. NanoFront Palm is a lightweight, high-performance material made from ultra-fine fibers, providing superior grip and touch sensitivity. It's durable, moisture-wicking, and resistant to wear. Its advanced technology ensures a comfortable fit while maintaining performance in various conditions.

DS NASH
PALM

DS NASH PALM MATERIAL

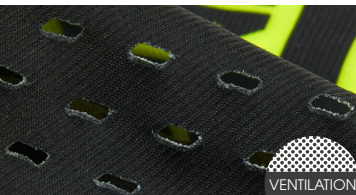

DS Nash Palm is a durable, lightweight material made from palm fibers. It offers excellent grip, moisture resistance, and eco-friendly properties, making it a popular choice for high-performance gloves and equipment.

SEAMLESS
CUFF

SEAMLESS CUFF

Seamless cuffs are designed for a comfortable fit without bulky seams, enhancing flexibility and reducing irritation. Their advanced construction provides a sleek look while ensuring optimal performance and ease of movement.

VENTILATION
HOLES

VENTILATION HOLES

Ventilation holes are strategically placed openings designed to enhance airflow and breathability. Their advanced design improves comfort by promoting moisture management and temperature regulation during various activities.

ROLLOVER
FINGERTIPS

ROLLED OVER & SILICONE FINGERTIPS

Rolled-over fingertips enhance durability and reduce pressure points, providing a clean, seamless feel for maximum comfort. The integrated silicone prints improve grip and control on brake and clutch levers, ensuring precise handling in all riding conditions.

CARBON

CARBON FIBRE KNUCKLE PROTECTION

Carbon Fibre Knuckle Protection offers lightweight, high-strength defense for enhanced safety during impact. Its advanced design ensures flexibility while maintaining durability, making it ideal for protective gear in demanding environments.

BUTCH CE CARBON GLOVE

FEATURES & SAFETY

- 1. Pre-curved ergonomic fit
- 2. 4-way stretch lycra® panels for flexibility

MAXIMUM AIRFLOW MEETS RELIABLE PROTECTION

Engineered at the microscopic level using **TPE – a 100% recyclable, lightweight, soft and flexible** material. At the core: a **non-Newtonian dilatant compound** that stays soft in motion and stiffens on impact for targeted protection.

Patented **volumetric lattice** with **3D overfolding** prevents penetration and distributes impact across layers. The **chimney effect** enhances breathability by directing warm air upward.

THE NEXT LEVEL OF IMPACT PROTECTION

Developed over a 2 year period, working with leading materials specialists and top DH and MX riders, this new impact foam technology offers unsurpassed levels of protection whilst maintaining freedom of movement, comfort and dexterity when riding.

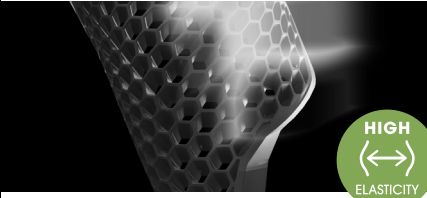

Exceeding CE EN1621-3 standards for motorcycle protection.

Independent testing was conducted by Ricotest, together with DolomitiCert, the leading laboratory in Europe, who are responsible for testing many of the leading brands of protection on the market.

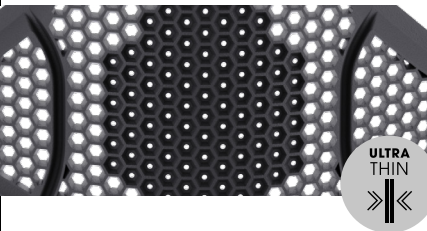

FEATURES OVERVIEW

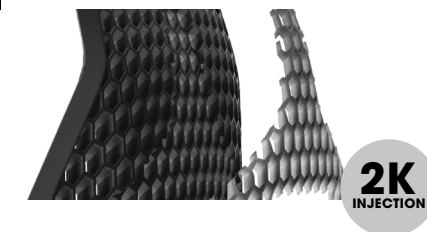

LEVEL I & II
The protector pad range meets the EN Level I and Level II standards. Level II is the highest level of impact protection available. This certification ensures that the pads provide superior impact absorption and safety in accordance with rigorous industry benchmarks.

FLEXIBILITY
Lightweight TPE and adaptive geometry allow full freedom of movement flexible in motion, protective on impact.

ULTRA-THIN
Ultra-thin protectors are designed to maximize flexibility and elasticity, allowing the protective pads to conform seamlessly to the body's movements.

2K INJECTION
We have integrated buckles and rigid components through advanced 2K injection molding technology. This approach ensures superior usability, combining robust fastening systems with enhanced bending protection, and thereby offering a level of flexibility in the protection range that surpasses all current market competitors.

NON NEWTONIAN
The pad incorporates non-Newtonian dilatants, which enable the protective material to stiffen upon impact while remaining soft when not under stress. This smart material design allows for pads that are flexible and adapt their microstructure in response to impacts, providing dynamic comfort and enhanced protection.

IMPACT TPE GEL
TPE shock-absorbing materials can be recycled and offer premium, slim protection without compromising safety, as proven by our laboratory testing.

CRASH CELLS
Crash cells use a structured TPE cell matrix to absorb impact energy and protect against penetrating objects such as stones or sharp debris. The overlapping cell design distributes forces over a wider area, reducing stress on joints and muscles. Compared to rigid hard shells, crash cells offer greater flexibility and comfort while maintaining high impact and penetration protection.

CHIMNEY VENTILATION
Chimney ventilation uses a vertical airflow system that channels warm, moist air away from the body through structured ventilation paths. Based on the natural chimney effect, rising heat is continuously transported upward and outward, enabling efficient cooling while keeping ventilation open and protection intact. The result is drier skin, improved comfort, and maintained impact and penetration protection.

DIRT FLX CHEST PROTECTOR

FEATURES

1. The newly developed Dirt FLX Chest/Back Protector combines state-of-the-art protective technologies with ergonomic design. It was specifically developed for riders who demand the highest safety standards without sacrificing comfort and freedom of movement.
2. TPE Level 1 and 2 IPX® Protector: High-performance TPE with proven protective properties in accordance with Level 1 and Level 2 standards.
3. Impact TPE Gel: The overlapping structure reliably prevents penetration upon impact. The protective material remains flexible and dynamically adapts to the rider's movements.
4. Dilatant Compound: The material reacts adaptively – the greater the impact force, the tougher and more resilient the structure becomes.
5. Bio-Foam Padding: Soft padding for maximum comfort, even on long rides. Individual Adjustability: Multi-adjustable shoulder pads and hip closures for a perfect fit to different body shapes.
6. Slim, lightweight design: Can be worn under or over a jersey without adding bulk. Freedom of movement: Ergonomic shape for maximum flexibility on the bike.
7. Chimney Ventilation: Specially designed air ducts allow hot air to flow upwards, preventing heat build-up.
8. Neck Brace Compatible: The design is conceived to be optimally combined with neck braces.
9. Featuring a replaceable mesh sleeve that acts as a protective outer skin easily swap it out if it gets torn or too dirty, keeping your main protector in top shape.
10. EN1621-2 Level 2 back protector
11. EN 1621-3 Level 1 chest protector

FEATURES OVERVIEW

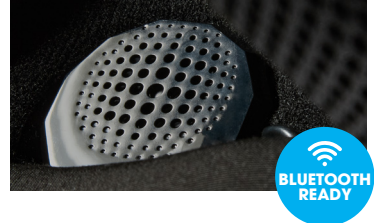

EMERGENCY QUICK RELEASE SYSTEM
E.Q.R.S. emergency cheek pad system allows quick, safe cheek pad removal for easier helmet removal in emergencies, aiding first responders and reducing risk of further injury.

MICROLOCK CLOSURE
Microlock is an easy-to-operate ratchet chin strap closure with precise adjustment and a secure fit.

PINLOCK® FOG FREE SYSTEM
The Pinlock 30 creates a double shield system through a silicone seal between the visor and the Pinlock insert lens, forming a double-lens solution that prevents fogging.

BLUETOOTH-READY
There are pre-formed cutouts for optional speakers in the ear area (Bluetooth device not included).

INTEGRATED SUN VISOR
Additional internal visor underneath the main visor ensures perfect visibility in bright and sunny conditions.

QUIN SMART SAFETY SENSOR INSTALLATION
Multifunctional Smart sensor for automatic emergency call, recording, transmitting accident and riding data. More information on page 4 / 5 or online: <https://www.oneal.eu/en/quin-system>
