IN THIS BOOK YOU WILL FIND CONFIDENTIAL INFORMATION ON OUR 2027 BIKE O'NEAL PRODUCT LINE.

WHILE THIS BOOK CONTAINS THE MAJORITY OF NEW PRODUCTS WITHIN THE LINE, ADDITIONAL ITEMS MAY BE ADDED AT A LATER DATE.

PRICING, AS WELL AS FINAL PRODUCT COLORWAYS, MAY BE SUBJECT TO CHANGE. ANY CHANGE WILL BE PROVIDED TO YOU IN WRITING WITH AS MUCH ADVANCE NOTICE AS POSSIBLE.

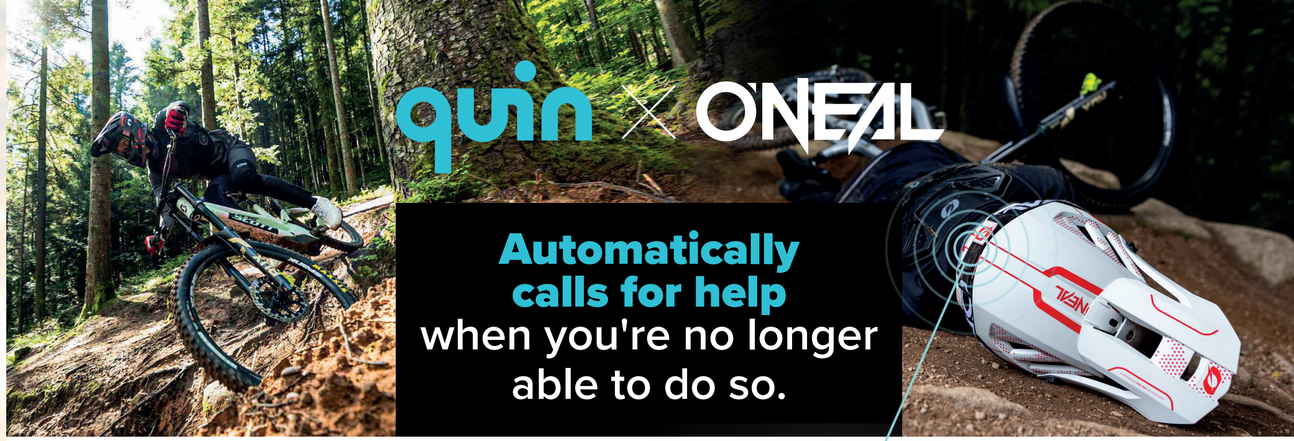

PROVIDING O'NEAL WITH YOUR PRE-BOOK ALLOWS YOU TO RECEIVE SPECIAL PRICING PROGRAMS. FURTHER, YOUR PRE BOOK ORDER ASSURES YOUR FULFILLMENT WHEN THE NEW 2027 LINE IS RELEASED. WE THANK YOU FOR YOUR CONTINUED BUSINESS AND SUPPORT!

IN CASE OF ANY QUESTIONS, PLEASE DO NOT HESITATE TO CONTACT YOUR O'NEAL REPRESENTATIVE.

THANK YOU FOR CHOOSING

O'NEAL

O'NEAL helmets now come with QUIN's intelligent safety technology ensuring help is on the way, even when you can't call for it. In the event of an accident, your emergency contacts are automatically notified, and the emergency centre is alerted to send help immediately.* All you need is the QUIN device and the app

FEATURES OVERVIEW

EMERGENCY QUICK RELEASE SYSTEM

E.Q.R.S. emergency cheek pad system allows quick, safe cheek pad removal for easier helmet removal in emergencies, aiding first responders and reducing risk of further injury.

ROTATIONAL IMPACT SYSTEM

IPX® is strategically placed alongside the EPS of the helmet and designed to reduce head injuries caused by rotational and low-speed impacts during crashing.

FIDLOCK® MAGNETIC CLOSURE

The magnetic Fidlock® buckle system uses a combination of magnets and mechanical locking to secure the helmet's chin strap. It allows for easy one-handed operation, offering quick and convenient fastening and release while maintaining a secure and reliable connection.

COOLMAX® LINING WITH ANTIBACTERIAL POLYGIENE® TREATMENT

The helmet liner delivers exceptional comfort and moisture control with a padded Dri-Lex® lining that keeps the head dry, enhanced by an antibacterial Polygiene® treatment for long-lasting freshness, and is fully removable and washable for easy cleaning.

BREAK-AWAY SCREWS

Break-away screws are specifically designed to break after an impact on the visor of the helmet.
By breaking away, the forces transmitted to the head are reduced. It provides additional safety in case of a crash.

GOPRO® MOUNT

The GoPro® mount allows you to attach all devices with a GoPro® adapter directly. The mount is screwed directly to the designated mount to ensure a stable attachment. The mount is flexibly adjustable to find the optimum recording angle for rides and centrally positioned.

QUIN SMART SAFETY SENSOR INSTALLATION

Multifunctional smart sensor for automatic emergency call, recording, transmitting accident and riding data.
More information on page 3 or

FEATURES OVERVIEW

FIDLOCK® MAGNETIC CLOSURE

The magnetic Fidlock® buckle system uses a combination of magnets and mechanical locking to secure the helmet's chin strap. It allows for easy one-handed operation, offering quick and convenient fastening and release while maintaining a secure and reliable connection.

ROTATIONAL IMPACT SYSTEM

IPX® is strategically placed alongside the EPS of the helmet and designed to reduce head injuries caused by rotational and low-speed impacts during crashes.

QUIN SMART SAFETY SENSOR INSTALLATION

Multifunctional smart sensor for automatic emergency call, recording, transmitting accident and riding data. More information on page 3 or online: https://www.oneal.eu/en/quin-system

SMALLER SHELL SIZES (FOR WOMEN & YOUTH)

The helmet shell has also been designed for smaller sizes so that it is especially suitable for women and youth.

POLYCARBONATE SHELL WITH EPS LINER

A polycarbonate shell with an EPS liner offers lightweight yet durable protection by combining a tough outer layer with an energy-absorbing inner foam. This design ensures impact resistance and enhanced safety, making it ideal for helmets and protective gear.

3D MULTI-POSITIONING SYSTEM

Perfect individual fit by using a size adjuster wheel for the head circumference. Additional height options for an excellent head position

FIDLOCK® MAGNETIC CLOSURE

STRATEGIC VENTILATION

HEIGHT-ADJUSTABLE PEAK

TRAPPER EVO

RIDER: DOUGLAS VIEIRA

FEATURES & SAFETY

1. The TRAPPER EVO was specially developed for demanding trail, enduro and freeride use
2. The lightweight In-Mold technology fuses the inner EPS and outer shell together, with an additional second layer protecting the outer edges and improving impact absorption
3. Strategically placed ventilation openings and internal channels for optimal air circulation - even at low speeds on technical trails
4. Fidlock® magnetic buckle (engineered in Germany) for easy, single-handed fastening and release, provides maximum security while riding
5. Padded comfort lining, removable, sweat-absorbent and washable
6. 3D size adjustment system with height and width adjustment, precise one-handed operation via adjustment wheel
7. Easily adjustable helmet visor with locking points, optimally adaptable for different light and weather conditions as well as glasses-compatible use
8. Meets EN1078 and CPSC safety standard for bicycle helmets.

B-ZERO ENTRY-LEVEL

FEATURES OVERVIEW

TEAR-OFF PINS

Tear-off pins are mounted on the outside of the lens to incorporate tear-off films, which are transparent, removable layers protect the main lens from dirt and debris, and can be quickly peeled off during use to restore clear vision.

ANTI-FOG & ANTI-SCRATCH COATING

Anti-fog and anti-scratch coatings prevent fogging and protect goggles from scratches. The anti-fog coating ensures clear vision in humid conditions, while the anti-scratch coating increases the durability of the lenses.

CE STANDARD

All products meet the necessary standards for safety, performance, and quality. CE certification for PPE (Personal protective equipment) items involves compliance with specific directives and standards, such as the Personal Protective Equipment Regulation (EU) 2016/425. Depending on the category there are different standards and different protection levels.

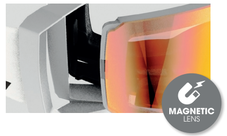

NOSE EMBOSSING

Nose embossing refers to the raised or contoured design added to goggles around the nose area. This feature improves comfort and fit by providing better contact with the face, helping to create a secure seal and reduce pressure points.

REMOVABLE NOSE GUARD

Easy-to-apply nose cover for additional protection on your goggle.

MAGNETIC LENS

Two-piece magnetic goggle with a maximum field of vision and an easy-to-operate lens change. Magnetic lens with Smart Outrigger locking mechanism for secure lens fixation.
Patent pending.

CONSCIOUS COLLECTION

RECYCLED MATERIALS

At O'NEAL, we're always looking ahead, continuously refining our products and pushing innovation for the future. Last year, we began our journey into sustainability with the launch of our first eco-friendly MTB collection. Our commitment to more environmentally conscious gear is not a one-time initiative. It's an ongoing responsibility.

OCEAN YARN

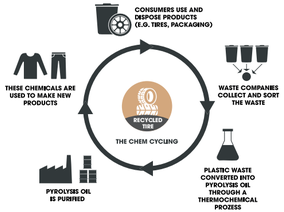

Ocean Yarn is a sustainable material created from recycled ocean plastic, aimed at reducing marine pollution and promoting eco-friendly practices. Ocean Cycle plays a crucial role by certifying the origin of the plastic, ensuring it is ethically sourced and recycled. Their certification guarantees traceability, transparency, and responsible recycling efforts throughout the process.

RECYCLED TIRE

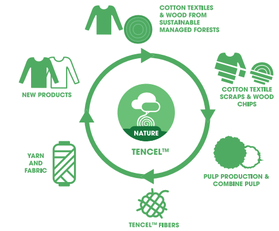

Recycling old car tires through pyrolysis involves heating them in the absence of oxygen to break them down into useful materials like oil, gas, and carbon black. The recovered carbon black can be refined and used to create polyester or blended fibers, which are then spun into fabrics for clothing production. This process transforms waste tires into sustainable fashion materials.

NATURE

TENCEL™ is a sustainable fabric made from wood fibers, primarily sourced from eucalyptus, beech, or spruce trees. The process involves dissolving the wood pulp in a non-toxic solvent to produce cellulose fibers, which are then spun into yarn. TENCEL™ is eco-friendly because it uses sustainably harvested wood, requires less water and energy than traditional fabrics, and the closed-loop production system recycles 99% of the solvent, minimizing waste and emissions.

T8 MECHANICAL STRETCH FABRICS

Enhanced Comfort: Mechanical stretch fabrics offer natural stretch without spandex, providing freedom of movement, perfect for active and casual wear.
Flexibility: High twist yarns and heat-setting ensure flexibility while maintaining shape and stability.
Durability: More durable and resistant than spandex fabrics, with no elastic fibers to degrade over time.
Environmental Benefits: Eco-friendlier, as they avoid synthetic elastic fibers, reducing environmental impact.

BIKE GEAR RANGE

ELEMENT FR

PIN IT

SLICKROCK

FEATURES OVERVIEW

FAST-WICKING MATERIALS
Fast-wicking materials to maintain comfort levels after rainfall and perspiration.

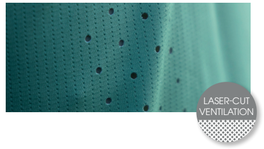

RECYCLED MATERIALS
Recycled materials help reduce waste, save energy, and lower carbon emissions. By reusing resources, we protect natural habitats and decrease pollution. Choosing recycled products is a simple way to support a greener future.

ZIPPED POCKETS
Hidden secure side back pocket in seam with zipper closure. Handy for stashing keys, bank card, lift pass, etc.

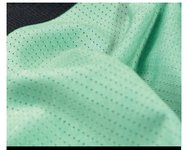

STRETCHING MATERIALS
4-way-stretch for increased freedom of movement and comfort while riding.

LASER-CUT VENTILATION
Laser-cut venting to promote airflow and cooling along with perspiration moisture escape for increased comfort while riding.

GOGGLE/SUNGLASSES WIPE
Built-in goggle/sunglasses wipe. Located on the inside of the front hem to keep clean and dry while riding and allowing easy wiping of goggles and sunglasses when stopped.

FAST-WICKING
ANTI-ODOR

RECYCLED
FABRIC

FEATURES

1. Fast-wicking, highly ventilated sustainable fabric
2. Anti-odor, ocean yarn and recycled polyester
3. Flatlocked seams for added comfort
4. Welded seams for more comfort
5. Laser-cut ventilation holes (HYBRID)

MATCH

6. Can be worn with or without protection
7. Matches all shorts and pants in the range
8. Available in two colours and designs

Sizes: S-2XL

Fit: Regular
Fabric Plain: 88% Recycled Polyester (from Ocean Yarn), 12% Spandex

Fabric Hybrid: 70% Recycled Polyester (of which 100% Ocean Yarn), 5% Cationic Dyeable Yarn (CD Yarn), 15% Spandex

FEATURES OVERVIEW

FAST-WICKING MATERIALS

Fast-wicking materials to maintain comfort levels after rainfall and perspiration.

ZIPPED POCKETS

Hidden secure side back pocket in seam with zipper closure. Handy for stashing key, bank card, lift pass, etc.

LASER-CUT VENTILATION

Laser-cut venting to promote airflow and cooling along with perspiration moisture escape for increased comfort while riding.

MTB INNER SHORT COMPATIBLE

Optional extra to provide an inner short complete with comfortable, contoured, breathable chamois pad for extra comfort when riding.

STRETCHING MATERIALS

4-way-stretch for increased freedom-of-movement and comfort while riding.

OVER-THE-KNEE CUT

The over-the-knee cut in MTB shorts provides optimal coverage and freedom of movement. Designed to protect the knees while accommodating pads, it ensures comfort and durability during rides, making it perfect for aggressive trail and downhill biking.

MATRIX

WINTER WP

REVOLUTION NANOFRONT

ELEMENT

PALM-SAVER

WINTER

FEATURES OVERVIEW

BREATHABLE FABRIC

Breathable fabrics are lightweight materials designed to enhance airflow and moisture management. Their advanced technology ensures comfort by keeping the wearer cool and dry, making them ideal for various activities and climates.

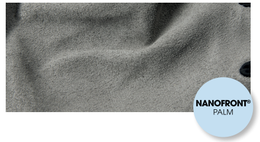

SLIP ON ENTRY

Slip On entry gloves feature a lightweight design that allows for easy on and off without a ratchet mechanism. This advanced construction ensures a comfortable fit and quick access, making them convenient for various tasks.

TPR PATCHES

Additional rubber applications on outer glove shell. TPR Patches are lightweight, high-performance components made from thermoplastic rubber, providing excellent durability and flexibility. They are abrasion-resistant, waterproof, and offer a secure grip.

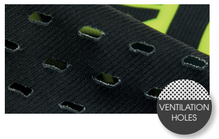

NANOFRONT® PALM MATERIAL

Thin high grip palm material offers unrestricted feel and control and maximum comfort. Nanofront® palm is a lightweight, high-performance material made from ultra-fine fibers, providing superior grip and touch sensitivity. It's durable, moisture-wicking, and resistant to wear. It's advanced technology ensures a comfortable fit while maintaining performance in various conditions.

SEAMLESS CUFF

Seamless cuffs are designed for a comfortable fit without bulky seams, enhancing flexibility and reducing irritation. Their advanced construction provides a sleek look while ensuring optimal performance and ease of movement.

VENTILATION HOLES

Ventilation holes are strategically placed openings designed to enhance airflow and breathability. Their advanced design improves comfort by promoting moisture management and temperature regulation during various activities.

ROLLED OVER & SILICONE FINGERTIPS

Rolled-over fingertips increase durability and minimize pressure points for a seamless, comfortable feel on long rides. The silicone prints on the fingertips enhance grip and control on brake levers, delivering precise handling and confidence on technical trails and in all riding conditions.

DS NASH PALM MATERIAL

DS Nash Palm is a durable, lightweight material made from palm fibers. It offers excellent grip, moisture resistance, and eco-friendly properties, making it a popular choice for high-performance gloves and equipment.

SHOES RANGE

PINNED SPD

PINNED PRO FLAT

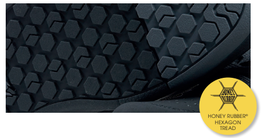

PINNED FLAT

PUMPS FLAT

FEATURES OVERVIEW

» MTB SHOES - FLAT

FLAT: THE OUTSOLE

All FLAT Shoes have our Honey Rubber® Hexagon outsole: Designed to deliver the perfect balance between traction when you need it most and the ability to reposition your feet on even the gnarliest of trails. Compared to our SPD shoes the FLAT range have more flexible soles to increase traction on the pedals, providing the perfect balance between grip, power transfer and foot repositioning.

FLAT: MATERIALS AND CONSTRUCTION

All FLAT Shoes have a durable and lightweight PU upper and include features that offer the ultimate balance between comfort and durability.

FLAT: VENTILATION AND COOLING

All FLAT Shoes have perforations in the uppers allowing moisture escape and cooling but still preventing water ingress. Lycra® ankle gaiter to prevent entry of dirt, debris and cold wind into the shoe for added comfort while riding.

FLAT: LACING

The laces are designed not to absorb water quickly and to slide more easily to assist tying and untying. Hook-and-loop mud flap for complete coverage of the lacing area for secure closure and protection from mud and water.

» MTB SHOES - SPD

SPD: THE OUTSOLE

With a full-length shank inside the sole the SPD range is stiffer from front to back than the Flat range to help with transfer of power from legs to pedals and bike. The tread pattern still allows for easy walking off the bike and also traction on platform SPD pedals even when the clips are not engaged. Professional riders often comment on the lateral stiffness left to right vs competitor Shoes giving great connection to the bike and reducing injury risk on hard landings and technical trails.

SPD: MATERIALS AND CONSTRUCTION

All SPD Shoes have a durable and lightweight PU upper and include features that offer the ultimate balance between comfort and durability.
SPD cleat compatible.

SPD: VENTILATION AND COOLING

All SPD Shoes have perforations in the uppers allowing moisture escape and cooling but still preventing water ingress. In addition as you move up the range there are additional features to promote this and increase on-bike comfort and performance.

SPD: LACING

The PINNED SPD features Easy-glide non-absorbing laces for individual fitting to every foot.
Quick-lace-system with single-handed pull cord for easy and quick fastening and release.

PROTECTION

IPX

MAXIMUM AIRFLOW MEETS RELIABLE PROTECTION

Engineered at the microscopic level using **TPE – a 100% recyclable, lightweight, soft and flexible** material. At the core: a **non-Newtonian dilatant compound** that stays soft in motion and stiffens on impact for targeted protection.

Patented **volumetric lattice** with **3D overfolding** prevents penetration and distributes impact across layers. The **chimney effect** enhances breathability by directing warm air upward.

THE NEXT LEVEL OF **IMPACT PROTECTION**

Developed over a 2 year period, working with leading materials specialists and top DH and MX riders, this new impact foam technology offers unsurpassed levels of protection whilst maintaining freedom of movement, comfort and dexterity when riding.

Exceeding CE EN1621-3 standards for motorcycle protection.

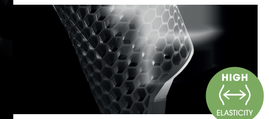

Independent testing was conducted by Ricotest, together with DolomitiCert, the leading laboratory in Europe, who are responsible for testing many of the leading brands of protection on the market.

FEATURES OVERVIEW

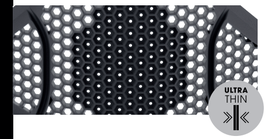

LEVEL I & II

The protector pad range meets the EN Level I and Level II standards. Level II is the highest level of impact protection available. This certification ensures that the pads provide superior impact absorption and safety in accordance with rigorous industry benchmarks.

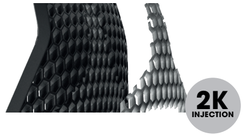

FLEXIBILITY

Lightweight TPE and adaptive geometry allow full freedom of movement flexible in motion, protective on impact.

ULTRA-THIN

Ultra-thin protectors are designed to maximize flexibility and elasticity, allowing the protective pads to conform seamlessly to the body's movements.

2K INJECTION

We have integrated buckles and rigid components through advanced 2K injection molding technology. This approach ensures superior usability, combining robust fastening systems with enhanced bending protection, and thereby offering a level of flexibility in the protection range that surpasses all current market competitors.

NON NEWTONIAN

The pad incorporates non-Newtonian dilatants, which enable the protective material to stiffen upon impact while remaining soft when not under stress. This smart material design allows for pads that are flexible and adapt their microstructure in response to impacts, providing dynamic comfort and enhanced protection.

IMPACT TPE GEL

TPE shock-absorbing materials can be recycled and offer premium, slim protection without compromising safety, as proven by our laboratory testing.

CRASH CELLS

Crash cells use a structured TPE cell matrix to absorb impact energy and protect against penetrating objects such as stones or sharp debris. The overlapping cell design distributes forces over a wider area, reducing stress on joints and muscles. Compared to rigid hard shells, crash cells offer greater flexibility and comfort while maintaining high impact and penetration protection.

CHIMNEY VENTILATION

Chimney ventilation uses a vertical airflow system that channels warm, moist air away from the body through structured ventilation paths. Based on the natural chimney effect, rising heat is continuously transported upward and outward, enabling efficient cooling while keeping ventilation open and protection intact. The result is drier skin, improved comfort, and maintained impact and penetration protection.

2027

NEW 2027

DIRT FLX
CHEST PROTECTOR

FEATURES

1. The newly developed Dirt FLX Chest/Back Protector combines state-of-the-art protective technologies with ergonomic design. It was specifically developed for riders who demand the highest safety standards without sacrificing comfort and freedom of movement.
2. TPE Level 1 and 2 IPX® Protector: High-performance TPE with proven protective properties in accordance with Level 1 and Level 2 standards.
3. Impact TPE Gel: The overlapping structure reliably prevents penetration upon impact. The protective material remains flexible and dynamically adapts to the rider's movements.
4. Dilatant Compound: The material reacts adaptively – the greater the impact force, the tougher and more resilient the structure becomes.
5. Bio-Foam Padding: Soft padding for maximum comfort, even on long rides. Individual Adjustability: Multi-adjustable shoulder pads and hip closures for a perfect fit to different body shapes.
6. Slim, lightweight design: Can be worn under or over a jersey without adding bulk. Freedom of movement: Ergonomic shape for maximum flexibility on the bike.
7. Chimney Ventilation: Specially designed air ducts allow hot air to flow upwards, preventing heat build-up.
8. Neck Brace Compatible: The design is conceived to be optimally combined with neck braces.
9. Featuring a replaceable mesh sleeve that acts as a protective outer skin easily swap it out if it gets torn or too dirty, keeping your main protector in top shape.
10. EN1621-2 Level 2 back protector
11. EN 1621-3 Level 1 chest protector
